

Cyber Security Services for Healthcare

NHS Data Security and Protection Toolkit (DSP)

Advice and Assurance services around compliance and submission of the NHS Data Security and Protection Toolkit (DSP)

Health and Social Care Network (HSCN)

Information security analysis and implementation guidance to help organisations conform to the HSCN Consumer obligations around ownership and responsibility for the HSCN Connection Agreement. These include incident reporting, cyber and information security, network monitoring compliance, securing information, access controls as well as information governance.

Cyber Risk Assessment and Management Services

We provide business impact assessments and analysis of your information security management system and infrastructure. We will provide independent advice and fully document any measures required to address any identified risks. In line with recognised frameworks and HMG best practice such as ISO 27001 or Cyber Essentials. We are also an official testing and certification body for schemes such as Cyber Essentials Plus and IASME Gold.

Privacy, GDPR and NISD Assessment Services

We can provide gap analysis and advice with respect to the Data Protection Act, Network and Information Systems Directive (NISD) Cyber Assessment Framework (CAF) and help to ready your organisation for the obligations around the General Data Protection Regulation (GDPR).
